

Publio Blenilio Tavares Silva

Senior Full-Stack Engineer

Phone: +55 (88) 99420-7775 **E-mail:** publio.blenilio@gmail.com **Github:** <https://github.com/publiosilva> **LinkedIn:** <https://linkedin.com/in/publio-blenilio>

SUMMARY

- Senior Full-Stack Engineer with 8+ years of experience designing and shipping cloud-native platforms end-to-end (frontend, backend, databases, and infrastructure), with 4+ years at scale in product companies (100K+ DAU). Core stack: TypeScript, React, Node.js, Python, MySQL, AWS, Terraform, Docker, and CI/CD. Based in Brazil, open to remote international roles (UTC-3).
- Consistently delivered high-impact solutions across multiple companies, including 99.9% uptime, ~150ms critical API latency (from multi-second), 95% test coverage, 70% fewer bug reports, 60% faster deployments, and 37.5% AWS cost reduction while serving 100K+ daily active users.
- Master's in Computer Science (Software Engineering focus: test and code quality) and Bachelor's in Software Engineering (Summa Cum Laude) from the Federal University of Ceará (UFC). Experienced mentoring developers, leading code reviews, and building production systems with Clean Architecture and rigorous automated testing (unit, integration, load, E2E).

SKILLS

TypeScript, React, JavaScript (ES6+), Node.js, Python, Go, Rust, Tauri, Vue.js, NestJS, Express.js, Flutter, MySQL, MongoDB, Redis, RESTful APIs, AWS (Lambda, ECS, RDS, DynamoDB, SQS, S3, API Gateway, CloudFormation, CloudWatch, CodePipeline), Terraform, Docker, Kubernetes, CI/CD, GitHub Actions, Jest, Cypress, Microservices Architecture, Serverless Architecture, Clean Architecture, Event-Driven Architecture.

WORK EXPERIENCE

Cupom Verde

Senior Full-Stack Engineer

Belo Horizonte, Brazil (Remote)

Apr 2021 - Present

- Engineered end-to-end product features across web, mobile, desktop, APIs, and data services for 100K+ daily active users using AWS (Lambda, ECS, RDS, DynamoDB, SQS, S3, API Gateway, CloudFormation, CloudWatch, CodePipeline, Glue), Node.js, TypeScript, Vue.js, Flutter, and cross-platform desktop apps with Go and Tauri + Rust.
- Achieved a 60% reduction in deployment time and improved deployment reliability by automating infrastructure provisioning with Terraform and infrastructure-as-code workflows.
- Achieved 99.9% uptime and a 50% reduction in API response time by profiling bottlenecks, optimizing backend request paths, and tuning MySQL and DynamoDB access patterns.
- Established 95% test coverage and a 70% reduction in bug reports by implementing CI/CD pipelines with automated unit, integration, load, and E2E tests (Jest, Cypress).
- Reduced critical API response times to ~150ms from multi-second latency by redesigning service logic and introducing asynchronous queue-based processing (SQS); cut AWS spend by 37.5% without sacrificing reliability.

Nubo

Full-Stack Engineer (Contract, part-time)

Remote

Sep 2024 - Nov 2025

- Built Python backend services and product-facing integrations for data-intensive workflows, hardening pipeline execution across ingestion, validation, and serving.
- Scaled distributed processing for high-volume pipelines with resilient orchestration and cloud-native service boundaries on AWS.
- Delivered REST APIs, data models, and deployable cloud services from product and operations requirements, improving cross-functional release predictability.
- Designed a medallion data lake (bronze/silver/gold) with layered transformations for dependable monthly partner deliveries.

Grupo Casa Magalhães (Innovation Lab)

Full-Stack Developer

Quixadá, Brazil

Oct 2020 - Mar 2021

- Built production-ready solutions in the company's innovation hub by owning delivery from prototyping through full-stack implementation and transitioning internal initiatives into deployable products.
- Delivered cloud-backed applications for major national retail clients using AWS (Lambda, API Gateway, DynamoDB, RDS, SQS, S3, CloudFormation, ELB), Node.js, and Vue.js.

- Institutionalized code reviews and automated unit, integration, and E2E testing to strengthen regression prevention before release.

Grupo Casa Magalhães

Quixadá, Brazil

Full-Stack Developer (Internship)

Mar 2020 - Oct 2020

- Developed internal full-stack applications that improved operational workflows using Node.js and Vue.js.
- Raised release confidence for internal web systems by combining manual validation with automated Cypress E2E tests across backend and frontend user journeys.

Sistema Maior de Comunicação

Quixeramobim, Brazil

Web Developer (Service Contracts)

Jan 2017 - Feb 2020

- Launched the company's web and mobile presence with Vue.js and Ionic, improving digital reach and user engagement across publishing channels.
- Expanded CMS capabilities and accelerated publishing workflows by creating custom WordPress plugins/themes and maintaining production websites.

RALC TI

Quixeramobim, Brazil

Web Developer (Internship)

Aug 2016 - Dec 2016

- Delivered foundational web application features by implementing backend and server-rendered modules with PHP.
- Improved application availability in development and hosting environments by installing and configuring Linux servers for web workloads.

EDUCATION

Universidade Federal do Ceará (UFC)

Fortaleza / Quixadá, Brazil

M.S., Computer Science (Software Engineering — test and code quality)

Graduation Date: Dec 2025

Universidade Federal do Ceará (UFC) — Quixadá campus

Quixadá, Brazil

B.S., Software Engineering

Graduation Date: Dec 2020 | Summa Cum Laude

EEEP Dr. José Alves da Silveira

Quixeramobim, Brazil

Technical Program, Information Technology

Graduation Date: Dec 2016

LANGUAGES

- English - Professional working proficiency (upper intermediate);
- Portuguese - Native Speaker;
